

BioICEP

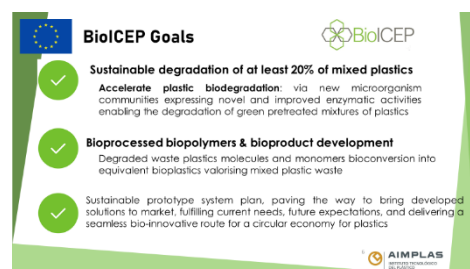

[www.bioicep.eu](http://www.bioicep.eu)

BioICEP is a €7 million EU-China Funded flagship project which will run from 2020-2024. AIT plus fourteen other partners from nine different European and Asian countries comprise the BioICEP project consortium.

The BioICEP participant countries represent different mixed plastic pollution environments and bring together specific cutting edge expertise and technologies to form to drive the ambitious project innovations to mitigate plastic pollution and revalorise waste plastic. A number of innovative booster technologies are at the core of this solution accentuating, expediting, and augmenting mixed plastics degradation to levels far in excess of those current achievable.

## Call for Posters

The BioICEP consortium wish to extend a call for posters to the postgraduate and research community within each of the partner Institutes and organisations to propose how their current research work is in line or fits with the ambitions and goals of BioICEP. The Consortium of BioICEP fully support collaboration, knowledge sharing and listening to the up and coming talent pipeline of researchers to assist in our mission to drive innovation and excellence for the BioICEP project.

The call seeks to have an A1 poster (pdf) presented for review to the BioICEP consortium for expert review. A selection of posters will be invited to make a flash 2-minute presentation of their science at the BioICEP General Assembly meeting to be held October 22<sup>nd</sup> 2020 (online).

The call for posters as sought under the following themes;

### Green Mechano-Chemical and/or Biocatalytic Approaches for

- 1) Sustainable degradation for plastics
- 2) Biopolymer fabrication

Presentations will be made to the Best Poster and Best Poster Runner Up.

This is an excellent opportunity for postgraduates and researchers to present and communicate their science and ideas for scientific development to an international panel/consortium in an area of grand challenge for our community of science and society.

Poster must be submitted by Friday 16<sup>th</sup> October to [bioicep@ait.ie](mailto:bioicep@ait.ie)

Prizes for Best Poster and Best Poster Runner up will be presented.

Full details and template can be downloaded from the BioICEP Website or email a request to [bioicep@ait.ie](mailto:bioicep@ait.ie)
